

African treasures with benevolent contribution – Kupanda Oils 2021

GfN GmbH & Selco GmbH

Dr. Katrin Massey

Sustainable, ethical and profitable

The 'Kupanda Way'

The 'Kupanda Way' is to respect the integrity of the plant's natural properties, thereby allowing the plant's pure and unhindered benefits to sustain our lives.

This concept extends into every aspect of our business: from our plant-based presence, ethical and traceable sourcing approach, social development agenda, quality orientated mindset, corporate growth plans, to our valued stakeholder relationships.

Multi-geographical presence, with key partnerships in Africa and Europe

Quality

We commit to high standards of delivery across our business:

- > Product quality delivered to valued clients
- > Operational processes, controls and protocols
- > Staff professionalism.

Sustainability

Balancing the use of our planet's precious resources today, for the benefit of tomorrow:

- > Sustainable farming and sourcing methods
- > Circular economy
- > Environment protection

Collaboration

As the African natural botanical industry develops, we maintain proactive and mutually beneficial partnerships.

Longevity

For us, the pursuit of longevity preserves quality, as reflected in:

- > Long-term stakeholder relationships
- > Technical innovations
- > Operational aspects.

Cyprus:
Kupanda Ltd Group HQ.
Commercial, quality
management activities

Germany:
Centralised oil production
Global logistics centre
Accredited laboratory

Greece:
Accredited laboratory

South Africa:
Kupanda Africa (Pty) Ltd, acts
as our pan-African sourcing hub.

Pan-Africa:
Raw material sourcing and powder
production.

Marula Seed Oil (Mfula) #7339 – Timeless sustenance

INCI (Sclerocarya Birrea Seed Oil)

- natural oil rich on fatty acids (oleic ~75 %) with high natural Tocopherol content a satin-like matt skin feel as well as extremely quick absorption
- exceptionally high levels of β -Sitosterol and Δ 5-Avenasterol
- sourced from the kernel of the marula fruit kernel
- unrefined oil is produced through cold-press extraction; refined oil is physically treated to lighten and deodorized

© Kupanda Ltd.

Use concentration:
15-100%

Marula Seed Oil (Mfula) #7339 – Timeless sustenance

African Cultural Significance and Folklore

- the Marula tree is a reliable source of sustenance, symbolizing strength, protection and regeneration
- African tribesmen attest to the blissfully intoxicated elephants from eating ripe and fermented marula fruits
- the tree's leaves act as a basis for aphrodisiac concoctions, and marriage ceremonies are performed around the marula tree
- the word 'mfula' means to extract goodness in the African Chichewa language

© Alta Oosthuizen/Shutterstock – Kupanda Ltd.

Marula Seed Oil (Mfula) #7339 – Timeless sustenance

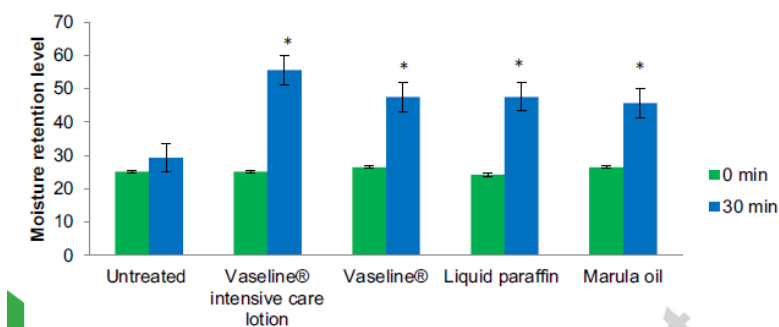

Activity

- active as an Anti-Oxidant, moisturizer and soothing agent
- suitable for:
 - Skin and Hair Care
 - After-Sun Care
 - Anti-Aging
 - Decorative Cosmetics
 - Dermatological Care
 - Soaps and Bath Additives

Skin Recovery Test Results

Occlusive Test Results - Moisture Retention

Ximenia Seed Oil (Mideka) #7331 – Natural pollution shield

INCI (Ximenia Americana (Ximenai) Seed Oil)

- natural oil rich on Ximenynic fatty acid and derivatives as well as large portions of monoenoic fatty acids
- seeds are sundried, cold-pressed at 45°C and the oil is filtered. No chemicals, solvents nor preserving agents are used
- substantial Tocotrienol content, considerable Lupeol and β -Amyrin content and β -Sitosterol
- unrefined oil is produced through cold-press extraction; refined oil is physically treated to lighten and deodorized

© Kupanda Ltd.

Use concentration:
7-50%

Ximenia Seed Oil (Mideka) #7331 – Natural pollution shield

African Cultural Significance and Folklore

- Ximenia trees (Ximenia Americana) are semi-deciduous shrubs scattered around various low-altitude and grassland regions of Africa.
- the shrubs were originally named after the 17th century Spanish monk Franciso Ximenez, and are affectionately known as the 'wild plum' or 'monkey plum' tree
- the word 'mideka' means to rejuvenate in the tribal regions of north-west Ethiopia

© ArgenLant-Shutterstock / Pilipipa-Fotalia / Kupanda Ltd.

Ximenia Seed Oil (Mideka) #7331 – Natural pollution shield

Activity

- active as stimulator of microcirculation with soothing and nourishing properties against environmental stressors
- suitable for:
 - Skin and Hair Care
 - Anti-Pollution and Detox
 - Anti-Frizz
 - Skin Barrier Repair
 - Hair Growth
 - Decorative Cosmetics

© Moniquemk / Shutterstock

Ximenia Seed Oil (Mideka) #7331 – Natural pollution shield

Study design

- assessment of collagen degradation (MMP-1 expression, type 1 Collagenase) and oxidative stress (Nrf2 activation)
- *ex vivo* human skin explants
- use concentrations 2 % and 5 %
- PolluBox[®] using Merck ICP's mix for pollution stimulation (heavy metals, benzene, xylene, toluene, diesel) as well as cigarette smoke
- 90 min exposure, control: unexposed
- evaluation by immunostaining after 5 days

Figure 3: PolluBox[™] BIO-EC France. This device enables pollutants to be vaporised into cloud form, exposing the surface of the skin to resemble physiological conditions as closely as possible.

© Laboratoire Bio-EC, France

Ximenia Seed Oil (Mideka) #7331 – Natural pollution shield

Anti-Pollution Protection

- Defending Collagen from degradation due to oxidative stress

Figure 4a: Reduction of MMP-1 expression in standard pollutant exposed skin explants, following Mideka Ximenia Seed Oil treatment P1 (2%), and P2 (5%), 5 days minus pollutant exposure.

Figure 4c: Histological scoring of degree of reduction of MMP-1 expression in standard pollutant exposed skin explants following Mideka Ximenia Seed Oil treatment P1 (2%) and P2 (5%), 5 days pre- and post-exposure pollutant mix. U = Untreated. V = Vehicle.

Kalahari Melon Seed Oil (Elula) #7329 – Deep nourishing savior

INCI (Citrullus Lanatus (Watermelon) Seed Oil)

- natural oil rich on Linoleic acid, coupled with oleic, palmitic and stearic fatty acids
- high γ -Tocopherol content
- contains significant amount of β -Sitosterol, Campesterol and squalene
- unrefined oil is produced through cold-press extraction; refined oil is physically treated to lighten and deodorized

© Kupanda Ltd.

Use concentration:
10-100%

Kalahari Melon Seed Oil (Elula) #7329 – Deep nourishing savior

African Cultural Significance and Folklore

- Kalahari melon is a wild fruit that originates from the southern African Kalahari desert and is the biological predecessor to the common watermelon
- the miracle of the kalahari melon is its ability to withstand the unrelenting heat and drought conditions offered by the Kalahari desert
- the San tribe, hunter-gatherers from southern Africa, relied on the critical nourishment provided by Kalahari melons; while ancient Egyptians applied the oil to maintain a healthy appearance
- the word 'elula' means to be or feel smooth in the southern African language of Xhosa, which is spoken in South Africa

Kalahari Melon Seed Oil (Elula) #7329 – Deep nourishing savior

Study design

- assessment of skin barrier repair (Fillagrin expression)
- *ex vivo* delipidised living human abdominoplasty skin explants
- use concentrations 2 % and 5 %
- control: untreated, control vehicle and evening primrose oil (positive control)
- evaluation by immunostaining of Fillagrin
- measurement after 0 hours, 3 hours and 24 hours

Kalahari Melon Seed Oil (Elula) #7329 – Deep nourishing savior

Activity

- active in skin repair and enhancement of barrier function, Anti-Oxidant
- suitable for:
 - Skin and Body Care
 - After-Sun Care
 - Decorative Cosmetics
 - Dermatological Care
 - Soaps and Bath Additives
 - Massage Oils
 - Sensitive Care
 - Dry Skin Care

Manketti Seed Oil (Buhle) #7333 – Filmogen for hair and body

INCI (Schinziophyton Rautanenii (Manketti) Seed Oil)

- natural oil relatively low on oleic to linoleic fatty acid proportions but comparatively high eleostearic fatty acid
- exceptionally high γ -Tocopherol and robust β -Sitosterol content
- unrefined oil is produced through cold-press extraction; refined oil is physically treated to lighten and deodorized

© Kupanda Ltd.

Use concentration:
5-100%

Manketti Seed Oil (Buhle) #7333 – Filmogen for hair and body

African Cultural Significance and Folklore

- the manketti tree (also known as the 'mongongo tree'), is scattered around southern Africa, usually distributed in large clusters which span a width of several kilometers. Taking a minimum of 25 years to bear fruit, the tree grows up to 20 meters in height
- the manketti fruit, broadly the size and shape of a common plum, emits a pleasant aromatic fragrance. The prized, creamy-yellow kernels, which is rich in oil and nutrients is encased in a protective shell
- communities have reported using the oil in the form of a lotion, to detangle and strengthen hair, and as a body oil, especially during winter months
- the word 'buhle' means beauty in the African language of Ndebele, which is spoken in the north-western regions of Zimbabwe

Manketti Seed Oil (Buhle) #7333 – Filmogen for hair and body

Study design

- assessment of skin barrier repair (fillagrin expression)
- *ex vivo* delipidised living human abdominoplasty skin explants
- use concentrations 2 % and 5 %
- control: untreated, control vehicle and evening primrose oil (positive control)
- evaluation by immunostaining of fillagrin
- measurement after 0 hours, 3 hours and 24 hours

Manketti Seed Oil (Buhle) #7333 – Filmogen for hair and body

Activity

- active in skin repair and enhancement of barrier function, filmogen for hair and body, Anti-Oxidant
- suitable for:
 - Skin and Hair Care
 - Anti-Aging
 - Decorative Cosmetics
 - Dermatological Care
 - Soaps and Bath Additives
 - Massage Oils
 - Sensitive Skin Care

Manketti Seed Oil (Buhle) #7333 – Filmogen for hair and body

Study design

- assessment of anti-frizz efficacy (volume) for a leave-on product
- *in vitro* on frizzy hair tresses
- use concentrations 2 % and 5 %
- proDerm Silhouette technique
- evaluation by image analysis
- control: vehicle
- measurement before (T0) and after product application (T1), after 24 hours (T2)

Manketti Seed Oil (Buhle) #7333 – Filmogen for hair and body

Figure 3: Reduction in Frizz (Volume) [%] - Relative Difference Values of all Measurements (n = 8). *Statistically significant results

© ProDERM GmbH

Manketti Seed Oil reduces frizz immediately up to 15% more efficient and up to 37% better after 24h. Hair Volume increased significantly.

Manketti Seed Oil (Buhle) #7333 – Filmogen for hair and body

Study design

- assessment of smoothing and enhancing flexibility
- *in vitro* on frizzy hair tresses
- use concentrations 2 % and 5 %
- universal test machine (Zwick GmbH), measurement of force needed to pull tresses along pre-installed metal bars (force 5 N - 10 N)
- evaluation by data analysis
- control: vehicle
- measurement before (T0) and after product application (T1), after 24 hours (T2)

Manketti Seed Oil (Buhle) #7333 – Filmogen for hair and body

Manketti Seed Oil improves hair suppleness up to 8,3% further.

Baobab Seed Oil (Moyo) #7337 – Deep care from the tree of life

INCI (Adansonia Digitata Seed Oil)

- natural oil with broadly balanced ratios of palmitic (~25 %), oleic (~35 %) and linoleic fatty acids (~30 %)
- robust levels of β -Sitosterol and γ -Tocopherol, high in Vitamin A, E and F
- seeds are wild-harvested, opening of the baobab pod is a laborious process
- unrefined oil is produced through cold-press extraction; refined oil is physically treated to lighten and deodorized

© Yellowj/Shutterstock

Use concentration:
8-100%

Baobab Seed Oil (Moyo) #7337 – Deep care from the tree of life

African Cultural Significance and Folklore

- the baobab tree is only found in the African savannah, and known as the 'upside down' tree
- the tree symbolizes protection and regeneration, and is used as shelter, and as a communal meeting place
- the word 'moyo' means to life in the African Chichewa language, and symbolizes how Africans have long revered the oil's healing properties.

Moringa Seed Oil (Wala) #7335 – Rebalancing skin microbiome

INCI (Moringa Oleifera Seed Oil)

- natural oil with high oleic and meaningful behenic fatty acids
- relatively balanced α -, β -, and γ -Tocopherol ratios
- high levels of β -Sitosterol, Δ^5 -Avenasterol, and Campesterol and Lipid soluble antioxidants
- the moringa seeds are ethically and sustainably sourced from collaborating communities, which are situated in remote and disadvantaged regions of Africa
- unrefined oil is produced through cold-press extraction; refined oil is physically treated to lighten and deodorized

© Kupanda Ltd.

Use concentration:
5-100%

Moringa Seed Oil (Wala) #7335 – Rebalancing skin microbiome

African Cultural Significance and Folklore

- the moringa is one of Africa's most treasured trees due to its unique physicality and pleasant aroma, together with its mystical place in Ancient Egyptian mythology and legendary African folklore
- the moringa tree has been bestowed with the title 'The Miracle Tree', or the 'Nebeday Tree', the tree that never dies
- traditional healers from central Africa (Ng'anga) worshipped the moringa tree as a means of reaching out to the gods. Ng'angas were said to have communicated to the gods via the moringa tree, humbly pleading for medicinal guidance
- the word 'wala' means to appear radiant or shine in the African language of Chichewa, which is spoken in Malawi

Moringa Seed Oil (Wala) #7335 – Rebalancing skin microbiome

Activity

- active in rebalance of microflora, skin barrier repair, Anti-Oxidant
- suitable for:
 - Skin and Body Care
 - Soaps
 - Cleansing Products
 - Hair Care
 - Moisturizer

Moringa Seed Oil (Wala) #7335 – Rebalancing skin microbiome

Study design

- assessment of microbe inhibition
- *in vitro* disc diffusion assay, evaluation by image analysis
- use concentrations 1 %, 2 %, 5 % and 100 %
- strains used: *B. linens* (present on human skin), *C. xerosis* (present on human skin, opportunistic pathogene), *C. albicans* (yeast present on skin and in the gut)
- control: tetracycline (antimicrobial positive control for *B. linens*, *C. xerosis*), fluconazole (antifungal positive control for *C. albicans*)
- measurement after 24 hours (*B. linens*, *C. xerosis*) and 48 hours (*C. albicans*)

Moringa Seed Oil slowed down growth of *B. lines* and *C. xerosis*. A week slow down in growth was shown for *C. albicans*.

Applicational Overview

Cosmetic Oils and Actives Application*

	Manketti	Ximenia	Moringa	Kalahari Melon	Marula	Baobab
Protection & Recovery						
Barrier Protection (from xerotic skin)	1 High linoleic acid coupled with γ-tocopherol Low oleic acid content		3 Presence of behenic acid	1 High linoleic acid coupled with γ-tocopherol Low oleic acid content		
Anti-Pollution (from environmental stressors)		1 β-amyrin and lupeol Tocotrienes and β-sitosterol support anti-oxidant properties				
Skin Microbiome						
Microflora Rebalance			1 High oleic acid is effective against a variety of microbes			
Cleansing & Anti-Blemish / Spots			2 High oleic acid is effective against a variety of microbes	3 High linoleic acid with β-sitosterol		
All-Round Cleansing, Hydration & Moisturising					1 Oleic, palmitic and stearic acids	1 Balanced oleic, palmitic and linoleic acids
Microcirculatory Stimulation						
Skin & Scalp/Follicles		2 Ximenynic acid as a microcirculatory stimulator				
Filmogen for Hair / Skin						
Filmogen for Hair	2 Elaeostearic acid is filmogenic Low oleic acid content					
Skin tightening/firming	3 Elaeostearic acid is filmogenic Low oleic acid content					
Antioxidant						
	3 Strong β-sitosterol content	1 Tocotrienes and good β-sitosterol	3 Rich in tocopherols, Δ5-avenasterol and campesterol	2 Highest β-sitosterol and campesterol	2 Robust β-sitosterol content	2 Good β-sitosterol content

Key: 1 Primary application 2 Secondary application 3 Tertiary application
