

Gentle and selective skin resurfacing

DermalRx[®] SRC-R

smoother,
more radiant and
younger-looking skin,
without the
harshness

DermalRx SRC-R

a skin resurfacing
oligopeptide derived
from biofermentation

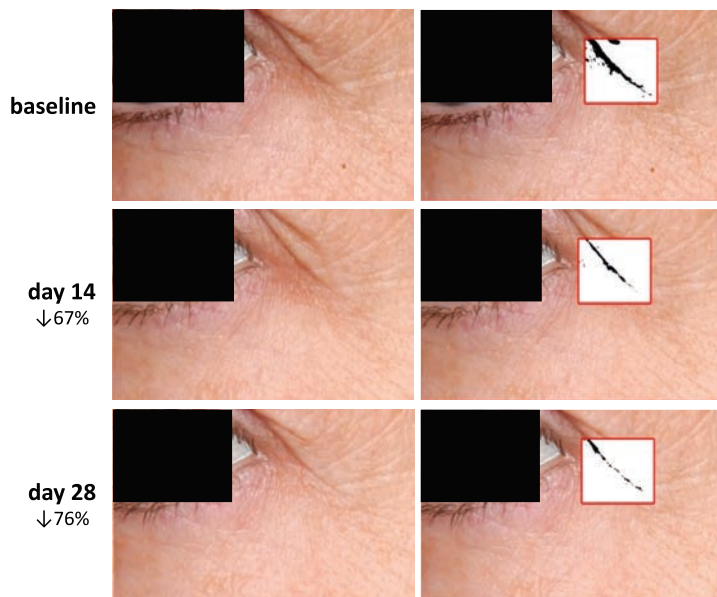

Applications

- Anti-wrinkle and anti-aging products
- Skin brightening & age-spot minimizing formulations
- Non-acidic exfoliants & skin renewal preparations
- Skin-perfecting serums
- Eye contour products
- Blemish formulations

Skin peels are widely recognized to improve the appearance of thickening skin, blemish-prone skin with enlarged pores, and photodamaged skin with wrinkling and uneven pigmentation. Chemical peels using α - and β -hydroxy acids have been available for several decades, but these harsh methods are effective only at low pH, irritate the skin, and can predispose to photodamage at higher concentrations.

DermalRx[®] SRC-R, produced via fermentation using a proprietary yeast strain, addresses the need for a less damaging exfoliant. The main active component in DermalRx SRC-R is an oligopeptide that enhances the skin's normal re-texturizing activity through a safe and selective mechanism of action. DermalRx SRC-R helps to gently loosen coarse, keratinized cells at the skin's surface and stimulate renewal with younger cells. DermalRx SRC-R is clinically proven to reduce the appearance of wrinkles and age spots, improving skin texture and elasticity. Participants saw a 26% reduction in skin roughness and a 43% improvement in skin brightness after four weeks of twice-daily DermalRx SRC-R application. DermalRx SRC-R results in smoother, more radiant, and younger-looking skin without the harshness of conventional exfoliating ingredients.

DermalRx[®] SRC-R Reduction of wrinkle appearance Participant #1671

DermalRx[®] SRC-R has significant anti-wrinkle activity, as demonstrated in a clinical trial with twice-daily application of 4% DermalRx[®] SRC-R.

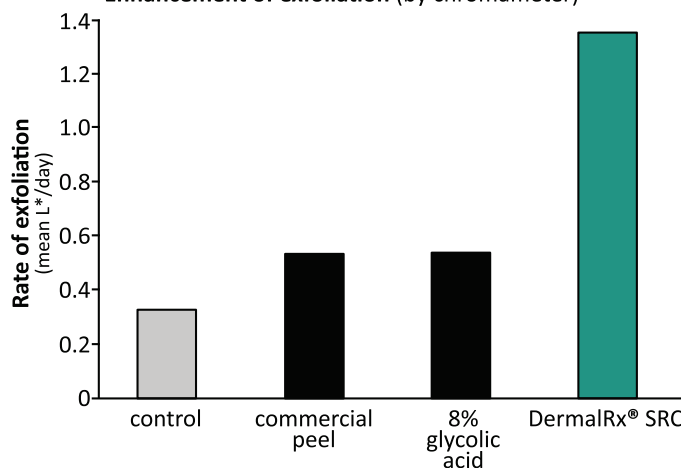

DermalRx[®] SRC-R

Product ID – R10099

Suggested Use Level – 1%-4%

Water (and) Saccharomyces Ferment Filtrate
(and) 1,2 Hexanediol (and) Hydroxyacetophenone

DermalRx[®] SRC-R Enhancement of exfoliation (by chromameter)

DermalRx[®] SRC-R is an effective exfoliant for the skin, superior to other commercially available enzymatic chemical peels.
